16:45 - 17:00 - Closing

The program is best suited for managers and high potentials

Price: €390

For registrations, please contact us at camelia@brainiup.com

Summary

Based on our best selling simulation **Before Mars**, the course challenges leaders to experience first-hand the effects of a fast, changing and complex environment on their teams engagement and performance. During the day, participants play the simulation and discover the key principles of leading people in a VUCA world.

Focus

- What is the impact of today's environment on my team?
- How can I support people that deal with volatility, uncertainty, complexity and ambiguity?
- How can I still get the results we need when the rules of the game keep changing?

Outcome

From having a deeper understanding of the way the world works now to getting practical ideas to implement at work, leaders that choose this program want to develop their managerial skills beyond delegating, giving feedback and managing performance.

By increasing the level of awareness on VUCA challenges and needed leadership skills, we help people develop an agile mindset and give them an overview of the skills they need to develop and deploy at work.
